An engineer who can take a product from idea to production on his own, and who architects the hard parts: complex state, real-time data, graphics and performance.

WHAT I BRING TO A COMPANY

01 Zero to production

Ships complete products, frontend to infrastructure.

6 public products

02 Hard-product architecture

Owns the frontend of an industrial HMI studio.

Angular · NgRx · SignalR

03 Cost-aware engineering

Moved AI inference off servers, into the browser.

No server-side AI

04 Full-stack range

C# / .NET, Angular, NestJS, PostgreSQL, Docker.

13+ years

CAREER

2024 – Now	Senior Frontend Developer Farineh Fanavar	Owns frontend development for an industrial HMI design studio : Canvas graphics, faceplates and symbols, design / runtime modes, SignalR live data and Monaco scripting, on Angular, RxJS and NgRx.
2021 – 2024	Full-stack Developer Freelance	Web applications end to end with Angular , React , Next.js , NestJS , Prisma , MySQL and PostgreSQL.
2020 – 2021	DevOps Engineer Bookbal	Implemented all infrastructure for a self-hosted web app: Linux, Docker, ELK, Git.
2016 – 2019	Frontend Developer Shatel	Platform frontend in AngularJS, Angular and TypeScript (PWA); contributed to the design system .
2012 – 2016	Earlier roles Soorati · Asan	IT Supervisor: networking for a 50+ employee company. Software Engineer: C#, WPF and ASP.NET MVC apps.

PUBLIC PRODUCTS · BUILT AND SHIPPED END TO END

Remixt

remixt-free ↗

Browser DAW. Demucs runs on WebGPU / Wasm in the browser.

Proves: **No server-side AI**

Khalabani

khalabani ↗

A320 flight simulator: fly-by-wire, ECAM, autoland.

Proves: **Complex real-time systems**

Gridways

gridways ↗

Mobile traffic-routing puzzle in strict TypeScript and Canvas.

Proves: **~80 kB, zero dependencies**

VasatYab

vasatyab ↗

Fair meeting-point finder: Next.js, Auth.js, Prisma, Mapbox.

Proves: **Full stack, E2E tested**

Siktir

siktir.fun ↗

Any link as a shareable button page: Angular 18, NestJS API.

Proves: **Auth, scraping, tested API**

Project Island

portfolio ↗

Portfolio as a drivable 3D island with P2P races.

Proves: **Three.js, WebRTC**

STACK

Lead with Angular · TypeScript · RxJS · NgRx · frontend architecture

Build with Canvas · SVG · Three.js · SignalR · WebGPU · Wasm · React

Ship with NestJS · Prisma · PostgreSQL · MySQL · Docker · Linux · ELK · Git

EDUCATION

B.Sc. Computer Science

Islamic Azad University

2012 – 2016
